## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of the species of Figure 2A in the reply filed on September 20, 2005 is acknowledged.

Claims 4-6 and 15-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 7-14 and 18-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Ito. Regarding claims 2-3 and 14, Figure 2 of Lee et al discloses notches 13d. Regarding claims 7-8 and 18-19, Lee et al (column 5, lines 23-30) discloses an aluminum substrate 12 and thermally conductive sheet 13. The recitation of “welding” and “welded” is considered to be a method limitation in an apparatus claim, which bears no patentable weight in this instance. See MPEP 2113. The device of Lee et al meets all the structural limitations of the claim.

Claims 1-3, 7-14 and 18-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee et al. Regarding claims 2-3 and 14, the vacant region of Lee et al are notches defined by tabs 302, which is read as a “serrate edge.” Regarding claims 7-8 and 18-19, Lee et al (column 2, lines 62-64) discloses an aluminum substrate 11 and thermally conductive sheet 10. The

recitation of "welding" and "welded" is considered to be a method limitation in an apparatus claim, which bears no patentable weight in this instance. See MPEP 2113. The device of Lee et al meets all the structural limitations of the claim.
